# Computer Confidence keeps everything running smoothly

## I.T. Support

### Who do you turn to in an I.T. crisis?

When you least expect it, often when trying to meet deadlines, your normally trustworthy computer or printers let you down.

P.C.s and software are normally robust and stable, but from time to time something goes wrong. A simple call for help to Computer Confidence can solve the problem and will save your business time, money and most of all, frustration!

With over twelve years experience of working with large corporate networks, such as the BBC and Royal Bank of Scotland, we have expertise at all levels;

- Single PC
- Networked file server
- Local Area Network (LAN),
- Wide Area Networks (WAN), their support and management .

Our Design and Installation Service will ensure your Network is 'right' from the start. Our thorough initial consultation will compile your Company's individual needs in an efficient, productive and cost effective way.

Combined with our Project Management Services, the installation and commissioning will be smooth and trouble free minimising disruption.

## Web Site Design And Hosting

Computer Confidence offers the combined services of Graphic Design and functionality in the creation of a web site. Having a web site will give customers confidence...

...not having one will drive customers away.

### Design

A website gives your business nationwide exposure. Your website lets you reach customers round the corner or across the country. It should be a unique design that reflects your Company's individuality and high standards. It must also clearly communicate the desired messages & information. At Computer Confidence we combine technical and creative graphic skills to create an attractive, functional site.

### Construction

Employing the latest techniques in graphic design and software development, Computer Confidence can produce everything from simple brochure sites to fully functional e-Commerce applications. We also have the skills to develop databases to support and collect data from the web site.

We are conversant with :

SQL ASP ADO HTML WWW VBSCRIPT

### Maintenance

Web Sites should be regularly reviewed and updated to encourage visitors to return frequently. Computer Confidence can assist in ensuring that your site is regularly updated, both visually and in content.

### Hosting

Whatever your requirements, Computer Confidence has its own servers, located in the London Docklands. We can ensure the performance of your web site reflects the standards of your Company.

# Tailor your Company's I.T. to suit and benefit **your** business.

## Bespoke Software Design and Construction

Why buy a software solution and expect it to fit into your business, right from the box? Why would it bring benefits to your business, when it was written by somebody else, for another company, perhaps in another country?

Are you looking for a software solution that will fix your business' specific problems?

Computer Confidence will work with you to create software that does what you want it to do.

It needn't cost the earth either, we have a range of pricing models to help you afford the development.

We also have a range of software already written, that we tailor to fit each client. Ask for information about our Dotwise brand products.

Tailor your Company's I.T. to suit and benefit **YOUR** business.

## Company Profile

Computer Confidence was founded in 1995, to help businesses make the best use of their investment in Information Technology. We provide a range of services including the design, supply and installation of office networks, bespoke software authoring, helpdesk support and Web Site creation, see our web site, [www.comfi.co.uk](http://www.comfi.co.uk), for the full range of products and services.

Computer Confidence co-ordinates a wide range of services with our strategic partners giving our Clients an easy, time saving, single point of contact. We take pride in being able to explain benefits and proposals to clients in everyday language, without the use of 'techno speak'.

In many cases, P.C.s are only used for simple tasks and not used to their full potential. A consultation will demonstrate the untapped resources in your business.

### **Tailoring your I.T. will:**

- Produce labour saving techniques
- Increase efficiency
- Make Staff more productive.
- Organise repetitive jobs, freeing Staff for more profitable work
- Make your business more competitive

Select from our comprehensive range of services allowing you to compile a specific, managed solution that's just right for your business.
